FOR DISTRIBUTION AND USE ON SNAP BEANS IN THE STATE OF DELAWARE DURING THE
EMERGENCY EXEMPTION PURSUANT TO SECTION 18 OF FIFRA, AS AMENDED.

REFLEX® Herbicide
EPA File Symbol No. 06-DE-03

EFFECTIVE DATE: April 28, 2006
EXPIRATION DATE: October 1, 2006

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Timing - Reflex must be applied prior to the development of the weed leaf stage indicated. Do not apply closer than 30 days prior to harvest.
SPRAY ADDITIVES - Add nonionic surfactant containing at least 75% surface active agent at 0.25 to 0.5% (½ to 1 pint per 20 gallons) of the finished spray, or nonphytotoxic petroleum-based crop oil concentrate containing 15% approved emulsifier at 0.5 to 1.0% (1-2 pints per 20 gallons) of the finished spray. Use of crop oil concentrate can improve weed control but may slightly reduce crop tolerance.

Personal Protective Equipment (PPE)

Applicators and other handlers must wear:
• Long-sleeved shirt and long pants
• Chemical-resistant gloves such as barrier laminate or viton.
• Shoes plus socks
• Protective eyewear

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:
• Coveralls
• Chemical-resistant gloves such as barrier laminate or viton.
• Shoes plus socks
• Protective eyewear

Refer to EPA-registered product label (EPA Reg. No. 100-993) on the product container for other Worker Protection Standard requirements.

PRECAUTIONS & RESTRICTIONS

• Thorough coverage of the weeds is essential to obtain adequate control of target weeds. Refer to the EPA-registered product label for spray application recommendations. For Ground Application: The use of flat fan nozzles will result in the most effective application of Reflex. Use nozzles that are set up to deliver medium quality spray (ASAE Standard S-572).

• REFLEX Herbicide requires a 1-hour rain free period for best results. Do not apply if rain is threatening.

• Care should be taken to avoid adverse impact to endangered or threatened species that may occur in treatment areas.

• Application must be made prior to bloom.

• Do not apply within 30 days of harvest.
• Fomesafen may not be applied on the same acreage more than once every two years.

• This product is toxic to birds and mammals. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Reflex Herbicide may not be applied to sites where run-off is likely to occur to aquatic habitats.

• Do not make applications when weather conditions favor drift from treated areas.

• In areas where soils are permeable and the water table is shallow fomesafen may leach to ground water.

• Livestock may not be grazed in treated fields.

Rotational Crop Plant-Back Intervals

Soybeans, cotton, dry beans and snap beans may be replanted immediately. For wheat, a plant-back interval of 4 months should be observed. For barley, rye, corn, peanuts, peas and rice, observe a plant back interval of a minimum of 12 months after treatment. To avoid crop injury, do not plant alfalfa, sunflowers, sugar beets, sorghum or any other crop within 18 months.

All applicable directions, restrictions, and precautions on the EPA-registered product label (EPA Reg. No. 100-993) are to be followed.

Any adverse effects resulting from the use of Reflex Herbicide under this emergency exemption must be immediately reported to the Delaware Department of Agriculture.

These directions for use must be in the possession of the user at the time of application.
