DUPONT™ SINBAR® HERBICIDE

FOR USE OF SINBAR® ON WATERMELON IN DELAWARE TO
CONTROL BROADLEAF WEEDS

FROM APRIL 25, 2006 THROUGH JUNE 15, 2006

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. SINBAR® Herbicide should be used for control of broadleaf weeds (i.e. annual morningglory) in watermelons.

USE DIRECTIONS

A maximum of one preemergence ground application of SINBAR® (terbacin) may be applied at a rate of 3 to 4 ounces product per acre (0.15 to 0.2 pounds active ingredient per acre). Do not exceed 4 ounces product per acre per year (0.2 pounds active ingredient per acre per year). A 70 day pre-harvest interval (PHI) is required.

Use the lower rate on course textured soils lower in organic matter. For seeded watermelons, make applications after planting but before the crop emerges.

Where plastic mulch is used as a cultural practice, apply SINBAR® to row middles only.

PRECAUTIONS

Do not apply over the top or allow spray to contact crop as unexpected crop injury may result.

Do not apply within 70 days of harvest.

A reduction in weed control may occur under adverse environmental conditions such as heavy rainfall or when low rates are used on soil high in organic matter.

Do not use this chemical within 100 feet of any streams, rivers, vegetative or non-vegetative waterways, seepages, swamps, bogs, or other aquatic transports.

This chemical has properties and characteristics associated with chemicals detected in ground water. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in ground water contamination.

The EPA Headquarters and EPA Region 3 office shall be immediately informed of any adverse effects resulting from the use of this pesticide in connection with this exemption.

IMPORTANT

BEFORE USING SINBAR®, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
